

Owls made of pine cones

What do you need:

- Pine and spruce cones
- Fallen tree bark, bark, leaves
- Maple seeds
- Acorn cones
- Wood glue

Instruction:

- You need two roughly equally sized, elongated parts as wings, for this we take a piece of tree bark on each side and glue them to the cone
- Next, glue on the eyes (acorn cap) and beak (a small cone) and leave everything to dry
- Then glue the ears (maple seeds) directly over the acorn caps
- If the cones do not stand on their own, you can also glue them onto a piece of wood or bark
- If you like, you can paint the owls, preferably with natural colours
